

package #1 training system starter set

Profile: Ideal for an athlete training alone using commands from the digitized internal starter, or with a coach. Accurate to 1/1000th second. Gives readings for reaction time, power output, and time to distance.

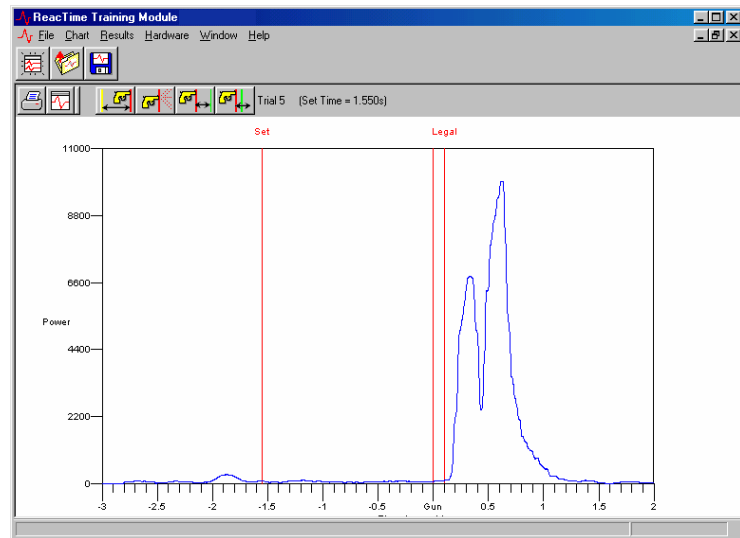

Includes: ReactTime Block Sensor, Speaker, Block Sensor Clamp, Activation Button, Signal Input Cable, Case.

package #2 advanced training system \$

Profile: Adds the ReactTime Gun Sensor Kit for use with a real Starting Pistol and the ReactTime Training Software to allow autonomous training with analysis, storage and printing of reaction time data traces downloaded from the Block Sensor.

Includes: ReactTime Training Software, ReactTime Gun Sensor Kit, Block Sensor, Speaker, Block Sensor Clamp, Activation Button, Signal Input Cable, Case.

additional optional items

- ReactTime Software (included in package #2)
- Single photoeye unit, reflector, with cable and tripods. 20 meters of cable is included.
- ReactTime Gun Sensor Kit (FinishLynx compatible).

Note: ReactTime units may be linked in pairs for competitive training. Up to ten photoeyes may be added for time to distance measurement. All packages come with instructions, technical support, and One Year Warranty. Packages may be modified at additional cost to suit your requirements.
