

PRODUCT INFORMATION SHEET PVC SMOOTH ROLL OUT MATS

Expertise in safety & leisure

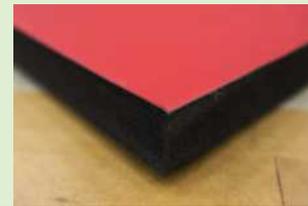

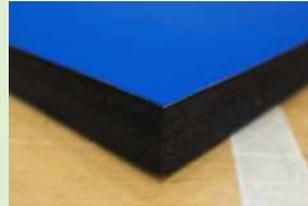

Since first launching our Roll Out Mats just over 2 years ago they have quickly become one of our most popular products, and it isn't hard to see why!

They are an all-purpose mat designed for use anywhere from schools to leisure centers to martial arts clubs. They are the ideal mat for places where matted flooring needs to be installed and removed regularly to make way for different events or sports.

FEATURES:

- Manufactured using a high-density cross-link foam (40kg/m³) - using tiny air pockets to cushion impact from falls and take downs.
- Heavy duty PVC surface which increases durability and longevity.
- Lightweight and easy to carry and transport.
- Can be supplied for single use or to cover a full room.
- We strongly recommend taping the mats together to create a seamless area which will also eliminate all cracks and crevices.
- Available in Black, Blue or Red

SIZES & WEIGHTS:

- 3m x 1.5m x 40mm - 8kg
- 6m x 1.5m x 40mm - 16kg
- 9m x 1.5m x 40mm - 24kg
- 12m x 1.5m x 40mm - 32kg

TOLERANCES:

All Promat Roll Out Mats are made to strict quality guidelines and manufacturing tolerances apply. Roll lengths/widths may have slight variances as follows:

- Length +/- 1%
- Width +/- 1%
- Thickness +/- 3mm

Please note all foam products used in sports mats are susceptible to minor expansion and contraction with temperature change. Be aware of significant temperature changes in your workout are which may need you to adjust mats accordingly.

INSTALLATION:

- Mats can be cut down to size before dispatch for specific room requirements.
- Mats can also be cut down with sharp Stanley knife once received.

PVC SMOOTH ROLL OUT MATS

Care and Maintenance Information

PVC Smooth Roll Out Mats are intended for use in all types of martial arts (MMA) and general gymnastics. Please note these are sports that can cause injury. These mats will not prevent injury but are for use to minimise an injury. Before engaging in any exercise or training program on a mat area you need to carry out an appropriate risk assessment.

Usage Tips

When installing PVC Smooth Roll Out Mats it is recommended that you frame them to ensure that no slippage will occur. Individual mats and non-framed areas may be prone to slippage and it is recommended that these mats are taped (PVC surface) together when creating an area to avoid damage to the mats and minimise risk of injury.

PVC Smooth Roll Out Mats are designed to be laid on a flat floor surface. If the surface is not flat this may cause damage to the mats and a possible risk of injury.

PVC Smooth Roll Out Mats have a smooth finish to minimise friction burns.

PVC Smooth Roll Out Mats are designed to be used in dry conditions. Moisture on the mats could increase the risk of slippage and injury.

Cleaning

Mats should be cleaned regularly. Failure to do so could lead to lower life expectancy of the mats and create health & safety risks. Dirt and dust build-up could cause mats to deteriorate.

To clean your mats we recommend that you do the following;

- For PVC mats use a sponge or mop for removal of stains.
- Only use warm water with a non-surfactant disinfectant cleaner.
- Do not use any form of detergent or bleach.
- Wipe up any spills as soon as possible.
- Do not use abrasive scrubbing tools.

Handling & Storage

- Mats should be stored in a suitable area to avoid damage. Leaning them on their sides can cause warping.
- It is recommended two people carry larger mats to avoid damage and risk of injury.
- Do not drag the mats as this will cause damage.
- Do not put any gymnastic apparatus or furniture on top of the mats which may cause damage.
